Hi Emy,

We are working on getting the consultant's site investigation report uploaded to the website. In the meantime, our staff report, which you will find at that link, includes key tables and figures from the consultant's report. The groundwater data is provided as staff report Table 5 (Table 10 from the consultant's report). The locations of the wells and other sampling points are shown on staff report Figure 3 (Figure 4 from the consultant's report).

And yes, restrictions against groundwater use will be included in the deed restriction we will be preparing.

Bob

Bob,

Thank you for sharing this information with us. Is there any plan for the deed to include a restriction against groundwater use?

I saw on the public notice that five groundwater monitoring wells have been installed for the disposal site. Would it be possible to see the data from this wells? I looked for the site investigation from 2010 and 2011 at the link you sent, but I did not see the files. Are these publically available?

Thank You,
Emy

Subject: Proposal to issue and NFA for The Dalles Disposal site

DEQ issued public notice today for a proposed Conditional No Further Action determination for The Dalles Disposal site. This site is owned by the Northwest Aluminum Company and is immediately south of the former Superfund site. I therefore wanted to bring this to your attention. The Port of The Dalles has applied for a prospective purchaser agreement for this land to facilitate industrial development.

Information about this site is available on the web at the following site:

<http://www.deq.state.or.us/lq/ECSI/ecsi.htm>

Select "Search Complete ECSI Database"

Enter the site ID number where indicated. For this site, the ECSI number is **2165**. Hit Submit. On the page that appears, click on the site ID number.
